Drinking Faucet
BPIR Declaration
Version: V2 (Apr 2025)

Designated building product: Class 1

Declaration
Puretec NZ LP has provided this declaration to satisfy the provisions of Schedule 1(d) of the Building (Building Product Information Requirements) Regulations 2022.

Product/system

Name	Drinking Faucet
Line	DFU Series and OT Series dedicated drinking tap
Identifier	Premium range: DFU Series Basic range: OT Series

Description

Intended Use:
Puretec DFU and OT Series taps are specifically designed as single-line drinking water tapware to be connected directly to your under-sink filtration system using 1/4" tubing. Taps are intended to be mounted to a sink or benchtop.
Composition:
Puretec drinking taps are made from either DZR brass, stainless steel, or chromed plastic with ceramic internal components (refer to individual tap specifications for material composition).
Dimensional/Geometric Variation(s):
Puretec DFU and OT Series taps are available in a number of designs and colors (refer to individual tap specifications for dimensions).
Other Properties:
Puretec drinking taps operate between 1.8-7Lpm depending on the inlet pressure, line length, and prefiltration.
DFU and OT Series taps are intended for use with drinking quality water only.
All DFU and OT Series taps are operated by a light-touch 1/4 turn spindle and do not require any significant force or range of movement to be operated by any persons.

Scope of use

Puretec DFU and OT Series taps are specifically designed as single-line drinking water tapware to be connected directly to your under-sink filtration system using 1/4" tubing.
Drinking taps are intended to be mounted to a sink or benchtop.
DFU and OT Series taps are intended for use with cold water only.
Drinking taps are suitable for use by people with disabilities

Conditions of use

All Puretec tapware must be installed by a registered plumber in accordance with the supplied user guide.
This product is intended for domestic use only.
Cleaning of tapware shall be done in accordance with the manufacturer's cleaning instructions
Min/Max temp: 2-52C Min/Max pressure: 200-500kPa Min/Max flow: 1.8 - 7Lpm (depending on upstream provisions and equipment) Connection : 1/4" tube (7/16" BSPM thread) Required hole for installation: 12.5mm diamater

Relevant building code clauses

B2 Durability — B2.3.1 (c)
F2 Hazardous building materials — F2.3.1
G1 Personal Hygiene — G1.3.2, G1.3.4
G2 Laundering — G2.3.4
G3 Food preparation and prevention of contamination — G3.3.5
G12 Water Supplies — G12.3.2, G12.3.10

Contributions to compliance

B2.3 : DFU and OT Series drinking taps have a minimum durability of 3 years of service life when not exposed to harsh cleaning chemicals, or excessive or undue force.
F2.1 : DFU and OT Series drinking taps are made using only food-safe materials, intended for use with potable water and ultimately human consumption.
G1.3.2 (b) : DFU and OT Series taps, when used as intended with an appropriate filtration system and suitable backflow prevention device will reduce the likelihood of food contamination.

Appendix

Note: The below appendix includes information relating to BPIR Ready.

Publishing this information is not a requirement under BPIR. Its inclusion here is to provide a reference for how this BPIR summary was generated as well as to help summary creators understand the performance clauses suggested by BPIR Ready.

BPIR Ready selections

Category: Tapware

	Yes	No
Capable of being permanently concealed		×
Suitable for accessible facilities	×	
Provision of hot water for sanitary fixtures		×

Building code performance clauses

B2 Durability

B2.3.1
Building elements must, with only normal maintenance, continue to satisfy the performance requirements of this code for the lesser of the *specified intended life* of the *building*, if stated, or:

- (c) 5 years if: the building elements (including services, linings, renewable protective coatings, and fixtures) are easy to access and replace, and failure of those building elements to comply with the building code would be easily detected during normal use of the building.

F2 Hazardous building materials

F2.3.1
The quantities of gas, liquid, radiation or solid particles emitted by materials used in the *construction* of *buildings*, shall not give rise to harmful concentrations at the surface of the material where the material is exposed, or in the atmosphere of any space.

G1 Personal Hygiene

G1.3.2
Sanitary fixtures shall be located, constructed and installed to:

a. facilitate *sanitation*,
b. avoid risk of food contamination,
c. avoid harbouring dirt or germs,
d. provide appropriate privacy,
e. avoid affecting occupants of adjacent spaces from the presence of unpleasant odours, accumulation of offensive matter, or other source of annoyance,
f. allow effective cleaning,
g. discharge to a plumbing and drainage system as required by Clause G13 Foul water when water-borne disposal is used, and
h. provide a healthy safe disposal system when non-water-borne disposal is used.

G1.3.4
Personal hygiene facilities provided for *people with disabilities* shall be *accessible*

G2 Laundering

G2.3.4
Accessible facilities shall be provided for people with disabilities.

G3 Food preparation and prevention of contamination

G3.3.5
Where facilities are provided for *people with disabilities* they shall be *accessible*.

G12 Water Supplies

G12.3.2
A potable *water supply system* must be—

a. protected from contamination; and
b. installed in a manner that avoids the likelihood of contamination within the system and the water main; and
c. installed using components that will not contaminate the water.

G12.3.10
Water supply taps must be *accessible* and usable for *people with disabilities*.
