Models with AMC include a protective cover. M Series is intended for indoor installation only. R Series is intended for indoor installation only. P Series is intended for outdoor installation. I Series is intended for indoor installation only. BASIC: WU-UV Series is intended for indoor installation only. Refer to individual product specifications for further details or ring Puretec Customer Care to determine the best solution for your installation.

Identifier	Premium Twin Filter + UV: HYBRID-E8 HYBRID-E9 HYBRID-G6 HYBRID-G7 HYBRID-G8 HYBRID-G9 HYBRID-R3 HYBRID-R4 HYBRID-M1 HYBRID-I8 HYBRID-I9 Premium Triple Filter + UV: HYBRID-E13 HYBRID-G12 HYBRID-G13 HYBRID-R10 HYBRID-R11 HYBRID-P1 HYBRID-P1-BL HYBRID-P3 HYBRID-P6 HYBRID-P6-BL HYBRID-P9 HYBRID-P12 HYBRID-I13 Premium Filtration with AMC Covers: HYBRID-E9AMC HYBRID-E13AMC BASIC Twin Filter + UV: WU-UV100 WU-UV200

Description

Puretec Whole House systems with UV Sterilsation provide safe and bacteria-free water for your whole house or facility.

Hybrid G Series is suitable for small to large households, these POE systems are designed for both mains and rainwater supply. This unit features a weather

protection cover that is suitable for outdoor installation on an exterior wall and features an anti-tamper & childproof lockable lid.

Hybrid E Series is suitable for small to large households, these POE systems are designed for both mains and rainwater supply. This unit features a weather protection cover that is suitable for outdoor installation on an exterior wall and features an anti-tamper & childproof lockable lid. Models with the AMC suffix include a protective cover.

Hybrid M Series is designed for POU applications. This system can be connected quickly and easily to any mixer tap. It turns your rainwater into pure, safe, delicious, and healthy drinking water.

Hybrid R Series is suitable for small to large households, these POE systems are designed for both mains and rainwater supply. This unit can be installed from left to right or right to left depending on the installation requirements. These units must be installed indoors.

Hybrid P Series is suitable for large households and light commercial applications. These POE systems are designed for both mains and rainwater supply. This unit features a weather-protective enclosure that is suitable for permanent outdoor installation along a wall, tank or fence line. These systems can also be freestanding as it includes 4 adjustable feet. The enclosure features an anti-tamper & childproof lockable set of gull-wing doors to make access and maintenance simple.

Hybrid I Series is suitable for small to large households, these POE systems are designed for both mains and rainwater supply. This unit can be installed from left to right or right to left depending on the installation requirements. These units must be installed indoors.

WU-UV Series is suitable for small to large households, these POE systems are designed for both mains and rainwater supply. This unit can be installed from left to right or right to left depending on the installation requirements. These units must be installed indoors.

POE - Point of entry (i.e.: inlet/feed water to a property) POU - Point of use (i.e.: single outlet, like a kitchen tap)

Scope of use

Puretec POU water filtration + UV systems are designed to suit most domestic and light commercial kitchen applications.
POU filtration systems will only treat the water at the outlet point of installation.

Systems are supplied with provisions to connect to standard 1/2" plumbing lines. All systems are capable of suiting other plumbing lines with the addition of commonly available plumbing fittings.
Puretec POE water filtration + UV systems are designed to suit most domestic and light commercial kitchen applications.
POE water filtration + UV systems will treat the incoming water from the point of installation only. Any incoming lines downstream of the system will not be treated by the system.
Systems are supplied with provisions to connect to either 1" BSP or 1 1/2" BSP plumbing lines. All systems are capable of suiting other plumbing lines with the addition of commonly available plumbing fittings.

Conditions of use

All Puretec POE filtration + UV systems are designed to be mounted vertically.
Refer to Individual spec sheets for installation guidelines.
Systems must be plumbed according to local guidelines by a qualified plumber.

Relevant building code clauses

Contributions to compliance

G12.3.1 (c) (ii) and G12.3.2: Puretec POE/POU whole house + UV water filtration systems are designed to treat mains water and rain water to improve commonly occurring aesthetic issues such as taste, odour, and appearance as well as bacteria. Refer to the individual systems specifications sheet for further information.
G12.3.7 (a),(b) and (c): Most Puretec filtration systems are provisioned with a Watermark-approved backflow prevention device. When systems are installed according to the manufacturer guidelines will reduce the likelihood of contamination within the system.
NP: Where systems are not provisioned with a backflow prevention device, Puretec offer a range of suitable aftermarket backflow prevention devices to suit 1/4" QC, 3/8" QC , 3/4" BSPM and 1" BSPM connections. Additional fittings are available to further expand compatibility options.
